

Peter Kascheev

Experienced (10+ years) Java Senior Developer & Technical Leader. Delivers high-performance microservices (Spring, Kafka, Kubernetes). Proven ability to lead teams and drive project success.

EXPERIENCE

DXC, Chief Developer | 2023 – Present

- I was instrumental in modernizing a trading platform. This involved migrating legacy systems to a microservices architecture for enhanced performance and scalability.
- Designed and implemented core modules: using Java, OpenShift, Spring, Kafka, PostgreSQL, Solace, FIX protocol, focusing on reducing order processing latency and stability of a critical platform

Luxoft, Senior Developer | 2021 – 2023

- Successfully launched the core transaction service for a high-volume B2C payments platform by building a complex, event-driven microservices architecture from the ground up.
- Engineered a robust microservices with Kafka, Event sourcing, CQRS, transactional Outbox, Service Mesh Istio, utilizing Java 17, Spring Boot, Spring Data, Hibernate, and PostgreSQL.
- Implemented highly efficient deployment on OpenShift

Samsung, Technical Lead | 2017 – 2021

- Led the full life cycle development of multiple Java-based backend systems, including a medical assistance application, a store assistant integration, and an online betting platform, leveraging a micro-services architecture. Utilized Java 11, Spring Boot, Spring Data, SIP, RTP, WebRTC, Cassandra, Kubernetes, Docker, and cloud technologies to deliver robust and scalable solutions.
- Provided effective leadership to a development team, resulting in the successful and timely completion of all projects

Mera-Sytasis, Senior Developer | 2014 – 2017

- Delivered a production-ready REST-based system for Sytasis alarming infrastructure, built from the ground up with Java, Spring Boot, Hibernate, Spring Data, Nginx, Drools, PostgreSQL, Elasticsearch, Ubuntu, Ansible, Angular.js and Webpack

Mera-Avaya, Software Developer | 2010 – 2014

- Successfully developed VoIP features of the AAS5300, using Java, Spring, Hibernate, JSF, JSP, Oracle, PostgreSQL, SOAP, WSDL, SIP, RTP, and SNMP

Mera-Nortel, Software Developer | 2007 – 2010

- Successfully migrated code from VxWorks to Linux, implemented security hardening, improving the stability of the Nortel CS1K project. Gained expertise in Linux systems and security protocols.

SKILLS

- Languages: Java, SQL, Groovy, JavaScript, Python, Perl
- Frameworks: Spring Boot, Data, JPA, Security, Messaging, Hibernate, Spring Cloud
- Messaging: Apache Kafka, RabbitMQ
- Microservices Architecture, Event-Driven Architecture
- Cloud & DevOps: Docker, Kubernetes, OpenShift, Ansible, AWS, GCP
- CI/CD: Jenkins, TeamCity
- Databases: PostgreSQL, Cassandra, MySQL, MariaDB, Redis, Oracle
- Web: HTML, CSS, jQuery, Node.js, Angular.js, Django, Nginx
- Protocols: HTTP, REST, SIP, RTP, gRPC, IPsec, SNMP, SOAP
- Software Engineering Practices: SOLID Principles, KISS, Test-Driven Development (TDD), YAGNI, Agile Methodologies
- Tools & Collaboration: Git, SVN, Jira, Redmine, Confluence

EDUCATION

- Master degree in Computer Science, 2007, Nizhny Novgorod State Technical University n.a. R.E. Alekseev
